

TAYLOR MAXWELL

# Fencing and Landscaping

# Good for you and good for the environment

Taylor Maxwell have been selling timber since 1959 and operate from 4 offices across the UK. We work in partnership with a select number of fencing and landscape focused sawmills throughout the UK and Europe and we deliver quality products with a high level of service at competitive prices.

Taylor Maxwell Timber Ltd holds PEFC and FSC® certification and is fully EUTR compliant. We are also members of the Timber Trade Federation (TTF) and are a responsible purchaser.

# Fencing and Landscaping Products

Our product range has evolved rapidly to satisfy the fencing and landscaping industry and now accommodates an increasingly large customer base nationally. Whilst the majority of supply is delivered directly from our sawmills based in the UK and Ireland, we've also created a stock range that can be mixed with other construction timbers from strategic port locations.

Throughout the supply chain, our emphasis has always been to offer a consistently high-quality service and product offering. This creates the loyal relationship that our customers rely upon throughout each fencing season.

Our fence post offering covers a huge variety of sawn, machined, morticed and pointed products in red and white wood. Our decking stock incorporates an anti-slip and composite range and our sleepers and feather edge productions are renowned for their exceptional quality. Many of these products are available with PEFC or FSC certification.

# Post and Rail Fencing

Produced to order in the UK and Ireland, quality spruce and pine post and rail, available in a full range of sizes and treatments.

# Close Board Fencing

A full range of high quality, feather edge boards, arris and cant rails and notched posts, are available from our select group of UK and Ireland based sawmills. Delivered in mixed full loads, treated or untreated.

PANELS

## Panel Components

For the UK panel manufacturer, we supply FSC certified spruce, single and double waney slats, square sawn slats and fence panel battens in both 16mm and 18mm.

SLEEPERS

## Softwood Sleepers

Produced from Pine or Spruce and supplied in full loads, green or brown pressure treated. Standard sizes are:

100 x 200 x 2400mm

120 x 240 x 2600mm

125 x 250 x 2600mm

# Oak Sleepers

Produced from French Oak and offered in full or half loads direct, or single packs from stock. Standard sizes are:

100 x 200 x 2400/2600mm

130 x 220 x 1800/2600mm

150 x 250 x 2600mm

Other sizes are available on request. We can also supply Romanian Turkey Oak and Canadian Red Oak sleepers if required.

SLEEPERS

# Reclaimed Sleepers

Available in softwood and hardwood grade A/B in full loads. Standard sizes are:

150 x 250 x 2600mm

150 x 250 x 2750mm

Combining **FSC® 100% certified hardwood timber** with recycled plastic, our Composite Prime® decking and fencing products offer the traditional look and feel of timber, with the attractive benefits the inclusion of plastic has to offer. For a longer-lasting, low maintenance alternative to timber look no further.

All of our composite decking and fencing products contain a combination of FSC® 100% timber from well managed sources along with recycled plastic. This means our composite decking and fencing are not only high in composite technology, they are also environmentally friendly and sustainable.

#### Did you know?

- ⬡ To create our decking, the equivalent of 9,520,000 milk bottles were saved from landfill over the last six months alone
- ⬡ The equivalent of 121,500,000 plastic bottle caps were recycled over the last six months alone
- ⬡ The equivalent of 3,000 bottle caps are recycled per square metre of decking
- ⬡ The equivalent of 280 plastic milk bottles are recycled per square metre of decking.

# HD DECK® XS

*HD Deck® XS* composite decking utilises wood plastic composite technology for a superior deck that's a low maintenance and durable alternative to traditional timber decking.

Made of FSC® 100% hardwood flour and recycled plastic along with UV light absorbers and anti-oxidants, to produce a high-quality decking, which offers a great alternative to traditional treated timber.

Walnut

# Anti-slip Decking

We work closely with a partner company who apply the anti-slip finish to our standard decking stock, providing a perfect match with our regular decking profile. For a quick delivery, we offer a standard colour anti-slip finish and profile. Other sizes and colours are available for your requirements. This product can be supplied in single pack quantities.

## **Fully tested and approved**

Tested in accordance with BS7976:2002, Taylor Maxwell's anti-slip has been officially recognised as being highly anti-slip\* in both dry and wet conditions with a typical minimum PTV of 71 when wet.

The manufacturing process is independently QA audited and is compliant with ISO 9001:2008.

The timber can additionally be preservative treated in accordance with BS8417:2011 use class 3 and 4, giving it an expected service life of 15 years for timber pine decking.

For added piece of mind, our preservative treatment process is one of the first in the UK to be awarded the coveted 'benchmark' approval under the Wood Protection Associations quality assurance scheme.

## **Durable and effective formula**

The Taylor Maxwell anti-slip process utilises a specially formulated and highly durable combination of resin and aggregate.

On application, the resin and aggregate mix becomes an integral part of the timber product, providing a highly effective anti-slip property to both wet and dry decking whilst fully retaining the natural characteristics of the timber.

\*PTV's of 30 or above are categorised as anti-slip

# Decking

We always hold large stocks of treated Swedish and Latvian kiln dried redwood decking in Rochester, Hull and Inverness ports. Standard sizes are:

32 x 150mm

32 x 125mm

38 x 125mm

A close-up photograph of several light-colored wooden planks, likely softwood, arranged in a way that shows their grain and how they would fit together in a gate kit. The planks are stacked and slightly offset, creating a sense of depth and texture. The lighting is warm, highlighting the natural wood grain and knots.

GATE KITS

## Gate Kits

We offer a standard 8-piece ledge and brace gate kit frame with capping (900 x 1795mm) and we can also manufacture to your specification. Produced from high quality, sustainable Swedish softwood, the kit is fully CNC machined to a strict tolerance and ready for assembly and treatment. The minimum order quantity is 600 gate kits.

POSTS

# Machine Rounds and Cundy Peeled

Produced from pine and spruce, machine round and Cundy peeled posts are available in a comprehensive range of diameters and lengths. Along with splits and rails, all can be kiln dried for HC specified use and pressure treated.
